

-2-

evidence from the mexicans who saw the affair, most of them being unable to speak any English at all and all being very reluctant about telling what little they knew about the quarrel. Hernandez was of a very quiet and reserved disposition and I am satisfied that he would never be the agressor in any trouble and that it would take considerable provocation to get him to start a fight, but he is the kind that when started would in most cases stand his ground.

If he has conducted himself properly at the State Institution, I recommend that his sentence be terminated and that he be given another chance to go out into the world and make his way as a good citizen.

Respectfully yours,

Deputy Sheriff of Beaver County.
