

intended to pay. He was just dead beating them out of their merchandise. And now I must work and pay back this money I borrowed to help him and I am not in very good health or very strong. I am an honest woman and married him in good faith and trusted him only to be robbed and betrayed. I found out to late that he never was the good man he represented himself to be in fact he is nothing but a low life adulter, thief and scoundrel in general and has been such all his life. I followed him up for a while and he was running away from the law when he got caught in the meshes of the Utah law and got into trouble at Ogden Utah and landed behind the bars which is the proper place for him. And I have reason to think that he is also a murderer as his other wife Servilla disappeared from the face of the earth and nobody has ever seen or heard tell of her since he claimed she left him. Not even her mother and family who are very anxious about her. He has told to many lies about the manner in which she was supposed to have left him and he had all her jewelry and little personal keepsakes dear to a woman's heart which she would have taken with her. This happened on a little farm down in Louisiana. She also had quite a little money in the house and I don't think she ever left the farm alive of course these are just my suspicions but judging from the way he treated me I would put nothing past him. He also has a record in California as he told me he had to leave that country but didn't say why. He will be pleading for a pardon when his first year is up and will get his disreputable friends to help him and they will try and make the Pardon Board believe that this is his first offense and that he is not so bad but I who have suffered at his cruel hands do beg & entreat you not to be lenient with him or grant him a pardon until he has been there long enough to atone for his sins against me & others for he is not a good man or never was and he is old in sin and this is not his first offense by any means. I do not ask this in the spirit of revenge but only common justice for those who bring sorrow and trouble to others should be punished and he surely brought sorrow and trouble to me and I can prove I did my part and what was right by him. He is absolutely the most heartless, cold blooded, brutal, crafty scoundrel that God ever created and once more I beg of you before you ever grant him a pardon to give him a rigid investigation and I would like to ask the privilege of giving the Pardon Board a history of my case at length and in every detail. Love
