

my people as we thought every breath was the last so my husband said he was going to call Dr. Rich Jan Ogdan to see if there was any thing that could be done but on his way to town he had to go by a Chiropractor's office and it seemed like something said to him get the Chiropractor and he did and he came and now I will tell you he was paralyzed he had no use of any of his <sup>part</sup> body the only thing that was alive was his heart his eyes we both thrown behind his nose the main vertebra was thrown out of place between  $\frac{1}{4}$  and  $\frac{1}{2}$  inch it was over two week he was unconscious he ~~didn't know anything~~ <sup>couldn't ask</sup> for any thing to eat drink or any thing I was over

was to join the army and he wouldn't let me rest till I finally gave my consent and signed papers he went was gone a year to a training camp came home with an honorable discharge and was all right for awhile till he began to get out and look for work but he ~~was~~ week in his lower parts and his mind gets rambling some times and he is awfully nervous and at times he can't control his self. I am going to speak a little plain with you it might embarrass me if I were talking to your face to face but I want to explain every thing <sup>as</sup> clear to you as I can for I want to see if there can't be something done for the boy as he is being punished for something he cannot <sup>help</sup>

him nearly every minute day and night and after the two weeks he began to regain consciousness he would ask for me and for weeks he would pray for me for a minute or two then he was gone and his lower parts was paralyzed for months couldn't walk if he started to get up he would fall on his head it was about 3 months before he knew we were home and one day I sat him by the window and he wanted to know <sup>where</sup> we were and I told him and he didn't know the place well we had him for nearly a year before we dare let him out of our site at times he seemed to be very bright minded and other times not so much so then the second year all he wanted

Now Bro. Derr your aman. you know what men are and I don't need tell you that some are worse than others my boys aman no different to others only in this way most men can control themselves till they get where they know are think they are out of sight but with my boy he don't know at the time what he is doing are don't seem to realize that he is where he can be seen. If he does do any thing but there has been falsehoods told about him that I know were nothing but false words that I doubt the rest being much truth I will tell you of a time or two that he was put in jail for nothing once time about 3 years ago him and his wife were living with me and the boy's step father he was accused
