

he has been very despondent at times and some times I couldnt hardly blame him for he has had more trouble and suffered more than any other man in Utah and to think he has to be kept in jail all the time and no one cares enough about his condition are have enough respect for him are we to help have him tended to and we havent got the means but if I could get him home I would see if the County Dr could do any thing for him. the Chiropractors say they can cure him in three months we went and signed up a contract with one for 3 months but he only got about half the treatments when one night he was standing on a corner waiting for me and his

stepfather to come and some woman see him and sent in a report that cismans was hanging around so he got 15 days for that and he was working for the Chiropractor at the time so he lost his job there so you can see that every move he made he was put in jail for. I believe if he had went his 3 months he would of been all right for he done just fine for nearly a year and as I have told you before it is black falsehood that has him where he is to day but while we are suffering now some others will some other time they never stop to consider just pass sentence and put him in and when his time is up let him out just like the do animals no justice for some others get it all.
